

## ***SUI TOKEN BET (STB)***

### **DESCRIPTION**

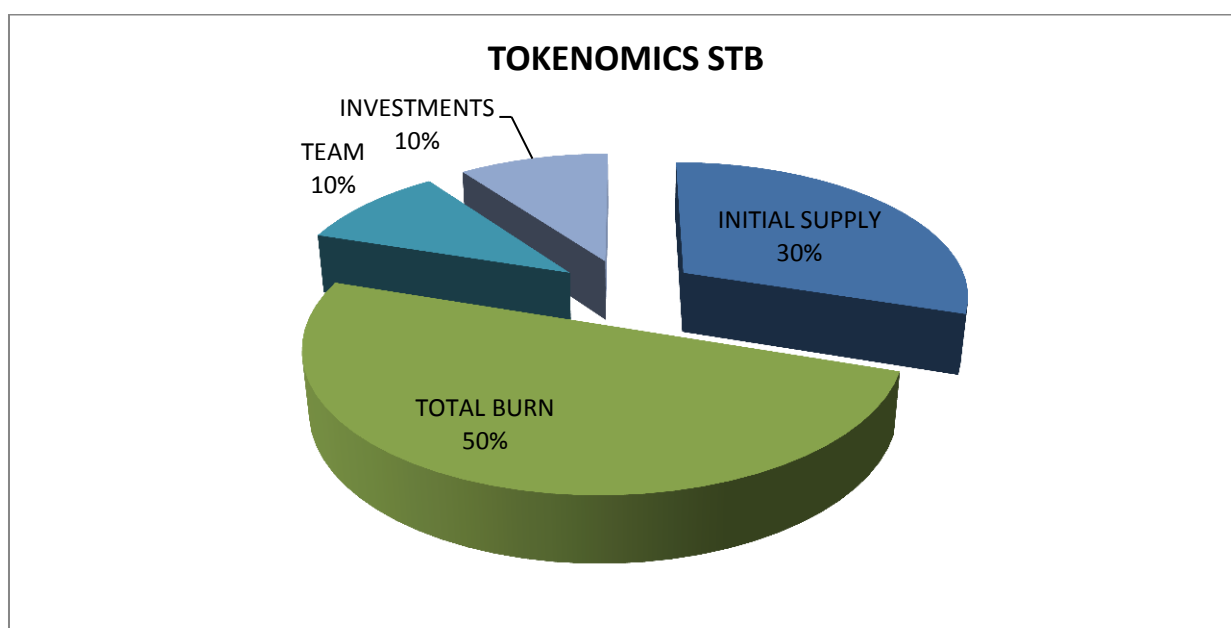

**SUI TOKEN BET (STB)** is a new “**BET token**” on the **opBNB** blockchain. Is created with the objective of increasing the value over time and providing benefits to the investors. With **STB** you can place sports bets, participate in lotteries and other economic activities. The main benefit is that it's not necessary to create any account with real data just “Login” with the digital wallet. All bets and rewards are made in the **STB** token.

To place a bet is something very simple. Access is made with the digital wallet, the bet and the amount to bet are chosen. Each bet corresponds to a unique digital wallet.

An important aspect of the **STB** token is the high deflationary coefficient. 50% of all existing STB tokens on the market will be “burned” during the first 2 years.
